28 Meriwether Tr, Congers NY 10920

Address

(845)-268-8088

Telephone No.

# Project Description

Project name: Snyder Cemetery Restoration

Describe the project you plan to do.

Snyder Cemetery is currently in deplorable condition. It is a small cemetery of about half an acre on Kings Highway (a local road). Weeds, plants, bushes, and trees have overrun the grounds. If one were to drive by, he may not take note of its existence. I plan to refurbish this rundown cemetery into a respectful resting place for the approximately 145 people buried there. I also plan to add a sitting area so local residents can use it as a restful retreat. I must first get rid of the vegetation that ensnarls the tombstones and the entire grounds and replace it with grass. I also plan to repair the weakening rock wall in front. I will then proceed to clean the tombstones, put up a fence, and set up some benches to finish the site.

What group will benefit from the project?

Town of Clarkstown and local residential community

My project will be of benefit to the group because:

I will be replacing an eyesore with a beautiful landmark, but more importantly I will be providing a proper resting place for the 145 people who lay in the burial ground and providing the community an opportunity to visit the site and learn about its historical significance.
